

Lowering Your Costs for Several Medications

UnitedHealthcare's goal is to help make prescription medications more affordable for you and your employer and offer you medication choices under your benefit. We also want to provide you with the resources and tools you need to understand your medication options, so you can make informed decisions about your care.

The following brand-name medications are available under your pharmacy benefit at a lower cost effective September 1, 2007. UnitedHealthcare moved these medications from Tier 3 to Tier 2 on the Prescription Drug List, lowering your out-of-pocket costs for these medications.

- | | | |
|-------------|---------------------|------------|
| • Actimmune | • Increlex | • Tarceva |
| • Apokyn | • Lotronex | • Temodar |
| • Baraclude | • Marinol | • Thalomid |
| • Casodex | • Nexavar | • Tobi |
| • Comtan | • Oxsoresalen-Ultra | • Ventavis |
| • Diastat | • Pulmozyme | • Vfend |
| • Elmiron | • Revatio | • Xeloda |
| • Emend | • Rilutek | • Xolair |
| • Gleevec | • Sandostatin | • Xyrem |
| • Hepsera | • Sutent | • Zyvox |

The Prescription Drug List is a list of medications approved by the Food and Drug Administration (FDA) and covered under your pharmacy benefit. The Prescription Drug List groups medications into tiers based on their overall health care value. The best value medications are included in Tier 1 and are the least expensive medications. Tier 1 is the lowest copayment tier and Tier 3 is the highest copayment tier under your UnitedHealthcare pharmacy benefit. When making tier placement decisions, we strive to provide the greatest choice of medications at the most affordable cost.

In addition to these new Tier 2 medication options, many Tier 1 alternatives are also available that may be appropriate for your treatment. Visit myuhc.com[®] to review specific benefit information including tier assignments and to determine if there are lower cost options available to you. We encourage you to discuss these options with your doctor to see if one might work for you.
